

## **PERSONAL STATEMENT**

I am a certified Sustainability Professional (ISSP-SEA), Sustainability Specialist, Environmental and Social Specialist with over 8 years cross-cultural experience in the design, development and implementation of sustainability (ESG) initiatives/strategies, sustainability reporting, ESG data collection and management using modern user-friendly tools/systems, environmental studies/project coordination and management, environmental fieldwork design and execution, environmental assessments reports, project management & implementation, environmental laboratory analysis with keen interest in Instrumental Analysis/Chemistry.

I am actively involved in numerous completed and ongoing initiatives, projects and studies in Nigeria's manufacturing and mining (cement, oil & gas) sectors especially in the preparation of sustainability (ESG) reports to diverse stakeholder groups (internal and external), environmental studies reports, laboratory analysis and data generation for use in numerous sustainability and environmental studies/reports such as Annual Sustainability Report and Disclosures, ESG Communication of Progress (COPs), Stakeholder Engagement and Materiality Assessment, ESG Performance Benchmarking, Socioeconomic Impact Assessment (SIA), Environmental and Social Impact Assessments (ESIA), Environmental Baseline Studies (EBS), Environmental Evaluation & Extend of Contamination, Biological Monitoring Studies (BMS), Crude Oil Fingerprinting & Oil Spill Forensic Study, Shoreline Clean-up Assessment Techniques (SCAT), Environmental Remediation, etc.

I have managed, coordinated, and supported the implementation of numerous Sustainability initiatives and ESG policies actualization and compliance to relevant sustainability framework/codes (e.g., GRI, UNGC, NCCG, SEC-CCG, NSE-SDGs, GCCA, IFC, UN-SDG) using internal organizational network of cross-functional sustainability leads/champions, reporting structures/compliance, implementation systems, etc.

I have coordinated and supported in the preparation of annual sustainability reports and ESG disclosures reports. I am a prolific writer of and contributor in numerous classes of environmental and social studies/reports in Nigeria especially the Oil-rich Niger-Delta region. These studies/reports were approved by Nigeria regulators such as Department of Petroleum Resources (DPR), Federal Ministry of Environment, National Oil Spill Detection and Response Agency (NOSDRA), etc. Furthermore, I have coordinated and participated in numerous Environmental parameters sampling and fieldwork designs in several Nigeria Oil & Gas facilities – Oil Mining License (OML) situated both onshore & offshore.

Currently, I am a Sustainability Specialist/Analyst for Dangote Industries Limited (Dangote Group). Before my current role, I was an Environmental Specialist & Laboratory Manager for Environmental Resources Managers Limited (ERML), a Sustainable Development & Environmental Consulting firm in Lagos, Nigeria. In the same vein, I am also an author of numerous published scientific articles. I have participated in several conferences, seminar, trainings, and workshop.

I am a certified Sustainability Practitioner with International Society of Sustainability Professionals – Sustainability Excellence Associate (ISSP-SEA) certification; certified ISO 2600 (Social Responsibility) Implementer, Auditor and Trainer. Also, a Member of Nigeria Environmental Society (MNES), Member of International Association of Impact Assessment (IAIA) and Student Member of Institute of Environmental Management and Assessment (IEMA) and Chartered Institution of Water and Environmental Management (CIWEM).

Currently, I am enrolled at University of Derby, United Kingdom for Master of Science (M.Sc.) in Sustainability and Environmental Management. The M.Sc. course modules includes Sustainable Business Management, Environmental Impact Assessment, Tools for delivering sustainable solutions to environmental problems, International Environmental Policy and Law, Pollution Assessment & Remediation, Low Carbon Energy Management, Ecology and Conservation and Global Resource Management.

I possess a Bachelor of Technology Degree in Biochemistry from the Federal University of Technology, Akure, where I graduated with a Second Class (Upper) Division certificate (4.24/5.00 CGPA) and came out second (2nd) in a class of 76. I also possess Distinction certificate (4.72/5.00 CGPA) in University Diploma in Science from the same University.

I am a good team player, with good intellectual and analytical mind. Researching, efficient resources management, team leading and inner desire to “always make a difference” are some of my numerous strengths. I seek to be deployed in roles where my skills will be harnessed toward organizational profitability and career fulfillment.

I am a composed, diligent, and responsible fellow. My strong points are effective negotiation and managerial skills, proven leadership ability with excellent team play and good communication. Although very inquisitive in nature, I have a high degree of analytical skills. I am a team builder, training & leadership with solid knowledge of the project development process committed to my care.

I strongly believe that this rare opportunity, will afford me more exposure, experience, boost in scientific knowledge, and technological upgrade. Thus, I will be more than honoured if I am duly considered. I promise to exploit my potentials to the fullest for the “common good of all”, and to work with all my verve and enthusiasm in order to maintain the penchant for excellence.

**AGBEBI, Oluwaseun Joshua**
